### Product Specifications

|                              |                                                   |
|------------------------------|---------------------------------------------------|
| Product Type                 | RJ45 patch panel                                  |
| Installation Temperature     | -10 °C to +60 °C                                  |
| ANSI-TIA Category            | n/a                                               |
| Cable type                   | unshielded                                        |
| Installation temperature     | -10 °C to +60 °C                                  |
| Rack unit                    | 1                                                 |
| Total ports                  | 24                                                |
| ROHS compliant               | yes                                               |
| Wiring                       | T568A/T568B                                       |
| IDC accept                   | 22-26 AWG                                         |
| Housing                      | High-impact Flame Retardant Polycarbonate,UL94V-1 |
| Dielectric Withstand Voltage | n/a                                               |

### Ordering Information

|                    |       |
|--------------------|-------|
| Color              | black |
| Packaging Quantity | 1     |
